INVENTIONS TECHNOLOGIES
(Link to company website)
Software developer at vodacom Tanzania PLC as contractor

february 2023 – present, contract
Dar-es-salaam, Tanzania

Revamp of the Vodacom Website, Developed a robust, state-managed SPA using **Vue.js, tailwind css** and **Pinia** at Vodacom. Leveraged **Pinia's modular** approach to efficiently manage application state, improving code organization and maintainability. Implemented **Vue Router** for seamless navigation and integrated with a RESTful API using **Axios**. This resulted in a faster development cycle and a more responsive user experience,

Integrated **Strapi** as a headless CMS to efficiently manage content, **reducing development time** and **enhancing content flexibility**. This resulted in a **more agile content management workflow** and a **superior user experience**.

Contributed to the development of a **customer support portal** using Nuxt.js and Pinia for the FWA customers utilized **Nuxt js server** side rendering(SSR), capabilities to improve SEO and initial page load times. Implemented **Pinia** for efficient state management, enhancing code organization and maintainability. **Integrated with a backend API** for data retrieval and submission. My contributions helped to create a user-friendly and efficient support portal.

Contributed to the development of **4G features** for Vodacom **FWA** web app, utilizing **Vue.js** and **Pinia.** Developed interactive components and implemented efficient state management to enhance user experience and improve network performance.

Developed a user-friendly **E-Gazeti dashboard and portal** using **Vue.js** at Vodacom, providing staff and media houses with a centralized platform for content management, analytics, and collaboration. Implemented interactive components and leveraged **Vue.js's reactivity** features to enhance the user experience.
